DIGITAL PRINTING COLOR INFORMATION

OFFSET VS. DIGITAL

Digital printing offers a shorter turnaround and more consistent end results than offset printing. Digital printers do not print PMS and RGB colors. These colors will have color shifts.

PMS (SPOT COLOR) MATCHING

Although digital printers do not print PMS colors, our production team will manually adjust the color output to match your spot colors upon request (per color/material). Please ask us about our PMS Color Matching service when you upload your files.

***Please note that 1-2 business days will be added to the turnaround time.**

MATERIAL

Printed colors look slightly different depending on materials.

RE-ORDERING

If you are in need of graphics from a previous order printed by us, let us know before you approve proofs. To match colors with previously printed graphics as closely as possible, we need extra time and information from you. We typically hold files for 3-4 months. By request, we can back up files for future use.

PRINTING METHODS

UV PRINTING

Using the 4-color process (plus light cyan and light magenta), we create weather resistant images for outdoor graphics using ultraviolet curable inks.

Used for: Roll Up Banner Stands

DIRECT-TO-FABRIC DYE-SUBLIMATION

The direct-to-fabric printing process applies the ink directly to the fabric using the 4-color process. The print then goes through the sublimation process of heat-plus-time to create beautiful, photo images.

Used for: Single and Double-Sided Flags

PAPER TRANSFER DYE-SUBLIMATION

The Dye-Sub Paper Transfer printing method takes the 4-color process to a new level, with a print quality that yields crisp lines and colors. Colors are printed directly onto paper which then get transferred to fabric and fused via dye-sublimation.

Used for: 4-Sided Table Throws, Fabric Displays, Dye-Sub Canopy Tent, and Fabric Pop Up Displays

All One Choice Products are enabled with Quick Proof!

Quick Proof is our automated proofing system that automatically checks accuracy of your file size. It then creates proofs and a proof sheet. Once these steps are complete, a "Ready for Review" email will be sent to you with instructions and the option to download your proofs. Quick as that!

If Quick Proof finds that your artwork is not at the correct size, we'll send you an email to explain.

Quick Proof Automation Process*

FEATURES:

- The Quick Proof System will preflight your art file(s) more quickly after successful upload.
- You will get a Proof Email (or Issue Notification) more quickly after the our system finishes pre-fighting your art file(s).
- The Quick Proof System will be much faster than our regular proofing method.

The Quick Proof System does not check spelling or CMYK colors.
